

## Alone

From *Jubilee 2023 FreshGrass* song cycle commission  
Becky Buller, *Goodnight Sparky Music*, BMI

What's it gonna take  
To hear beyond the noise  
I'm about to break  
I've got no choice  
I did everything you asked  
You claimed the harvest yield  
Now I'm eating grass  
In a potters field

Chorus 1:       Is there something for which I must atone  
                  'Cause it's over and I'm left alone

I've lost the constellations  
On this moonless night  
Every conversation  
Has its price  
No rest in my waking  
"To sleep, perchance to dream"  
Whispers leave me quaking  
My mind a silent scream

Chorus 2:       I'm wandering, a heart without a home  
                  It's over and I'm left alone

Bridge:         Oooo...alone...ooo

Chorus 3:       It would be better if I was laid beneath a stone  
                  It's over and I'm left alone

Chorus 3:       It would be better if I was laid beneath a stone  
                  It's over and I'm left alone
